

*Education Conference Room*

*BabySIM and SimNewB*

Over the past 10 years, members of the Skip Cline Society have helped advance the future of health care through philanthropy, while providing an active voice for the not-for-profit hospitals of Morton Plant Mease.

Each year, with help from their leadership committee, the collective gifts from Skip Cline Society members focus on the hospitals' emergency services and pediatric care.

➤ *Take a look at what your gifts have helped fund over the past 10 years:*

- **BabySIM & SimNewB** are interactive baby simulators that help our caregivers practice assessment and treatment of infant conditions in a realistic learning environment.
- **Giraffe OmniBed for Mease Countryside** is an all-in-one neonatal care station providing a developmentally supportive, critical care environment for our high acuity newborns.
- **Broslow Color Coded Carts** facilitate the care of our pediatric patients with the needed medication and equipment in an emergent situation.
- **Handheld Vein Finder** is a portable device that helps nurses easily locate the patient's veins to minimize unnecessary sticks.
- **neoBLUE Bilirubin Lights for Newborns** is an advanced phototherapy light system for immediately treating infantile jaundice.
- **iPads for Mease Countryside's Emergency Room and Pediatric Unit** provide direct engagement for children — helping to not only distract the patient, but offer educational games and videos to help children and their parents understand what's happening while they're in the hospital.
